AXEMED

Dental simulation lab: information pack

AxeMed SRL, a Belgian dental distributor, equips the preclinical labs of dental schools in the Benelux, together with the manufacturers.

The lab

- Saratoga Smily E and Junior: modular simulation units, multimedia station, Easy Teach classroom software.
- Frasaco: PK-2 phantom heads, AG-3 models, model teeth, AK-6/2 paediatric models.
- Cattani: central suction and compressors, sized for the room.

The steps

- Study: visit, inventory, teaching needs.
- Plans: rows, amphitheatre or islands, with the architect and technical services.
- Offer: tailored; in the Benelux, compliant with the specifications for a public tender.
- Installation: with the manufacturers, during a break in teaching.
- Follow-up: teacher training, maintenance, replacement teeth and models.

What we need from you

- Country and institution; number of students per year.
- Planned number of units and room plan.
- Deadline, any tender.

Outside the Benelux

- Outside the Benelux, supply depends on your country and on each manufacturer. Send us your project: we will pass it to the right contact, the manufacturer or its local partner.
